

Key Concepts:

Warning: this list is not comprehensive!

- **Pointer Notation:** * (declaration, dereference), &, []
- **Segmentation Faults**
- **Box and Pointer Diagrams**

Midterm Review:

Warning: this list is not comprehensive and only supplements previously unlisted concepts!

- **Command Line Arguments:** int argc, char* argv[]
- **Terminal Commands:** cd, ls, mkdir, rm
- **Compilations:** .cpp, .h -> .o -> .exe
- **Vim:** dd, i, :w, :q, :x
- **Git:** add, restore, commit -m, push, pull, remote add/remove
- **Output Streams:** cout vs cerr
- **Program End:** return vs exit(0) vs exit(1)

How do I exit Vim?

Asked 10 years ago · Modified 4 days ago · Viewed 2.7m times

- ▲ I am stuck and cannot escape. It says:
- 4786 type :quit<Enter> to quit VIM
- ▼
- But when I type that it simply appears in the object body.
